

## SUPRAPHIX????

markus.breitenlechner / PDF / ??, 06/13/2016 - 13:36

????

????

- Inline ink fixation and drying system
- Optionally usable saturated steam, superheated steam or hot air condition according to the amount of ink being used
- Controlled by a flow through steam / hot air stream
- Ensures highest penetration, ink fixation and drying in a single pass at shortest possible time
- Avoids fabric handling in another offline process
- Reduces energy consumption substantially, making the process more economic and ecologic at the same time
