

## Characteristics and Technology

### SUPRAMIX

- Dosing and inline mixing system used to mix and homogenize all kinds of chemicals
- The chemicals are dosed directly into the water stream ahead of the turbine by using precise screw pumps
- Inline dosing of up to 8 chemicals
- Full yield of thickener
- Air-free and lump-free stock paste
- Automatical dosing - no manual weighing and measuring

### Applications

- For stock thickener preparation
- For mixing and blending all kinds of liquids and pastes

## Technical Data

### SUPRAMIX

	Specification
Flow rate	up to 150 l/min
Dosing units	2 to 8
Mixing turbine	Multistage inline mixer
